ICAP™ interlocking panels fit together similar to Lego’s and staple or screw to the wall. The fast economical installation contains project cost while offering the time honored tradition of brick with an attractive, durable natural clay brick panel. The light weight reduces foundation cost and ease of installation. ICAP Insulated Brick is available in R-11 to R-19 insulation values with 1-hour, 2-hour firewall ratings and an NFPA-285 compliant series available for high-rise applications. High wind-load and Seismic Series also available. See at:
