**Quick-Drying Interior/Exterior Latex Stain Blocking Primer**

**B51W08670**

**CHARACTERISTICS**

- **Color:** White
- **Coverage:** 350 - 400 sq ft/gal @ 4 mils wet; 1.1 mils dry
- **Drying Time,** @ 77°F, 50% RH:
  - **Touch:** 30 minutes
  - **Recoat as a primer:** 1 hour
  - **Recoat as a stain sealer:** 4 hours
- **Finish:** 0-5 units @ 85°
- **Flash Point:** N/A
- **Vehicle Type:** Vinyl Acrylic
- **VOC (less exempt solvents):** <50 g/L; <0.42 lb/gal
- **Volume Solids:** 29 ± 2%
- **Weight Solids:** 43 ± 2%
- **Weight per Gallon:** 10.4 lb

**Tinting**

Requires ColorCast Ecotones for tinting. For best topcoat color development, use the recommended “P”-shade primer. If desired, up to 4 oz per gallon of ColorCast Ecotones can be used to approximate the topcoat color. Check color before use.

When spot priming on some surfaces, a non-uniform appearance of the final coat may result, due to differences in holdout between primed and unprimed areas. To avoid this, prime the entire surface rather than spot priming.

For optimal performance, this primer must be topcoated with a latex, alkyd/oil, water based epoxy, or solvent based epoxy coating on architectural applications.

For exterior exposure, this primer must be topcoated within 14 days with architectural latex or oil finishes.

For better performance when priming an entire house, use Exterior Latex or Oil-Based Primers.

---

**SURFACE PREPARATION**

**WARNING!** Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH approved) and proper containment and cleanup. For more information, call the National Lead Information Center at 1-800-424-LEAD (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Scrape and sand peeled or checked paint to a sound surface. Sand glossy surfaces dull.

**Drywall** - Fill cracks and nail holes with patching paste/spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

**Masonry & Concrete**

All new surfaces must be cured according to the supplier’s recommendations, usually about 30 days. Remove all form release and curing agents. Masonry surfaces must be dry before priming. Moisture content must be 15% or lower and the pH between 6 and 9.

Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

---

**PRIMARY BENEFITS**

- **Good Value** — This is a multi-purpose commercial primer formulated for general interior and exterior use.
- **Quick Drying** — As the name suggests, this primer dries in just one hour, so rooms can be topcoated soon after priming.
- The waterborne formula is user-friendly, delivering easy clean-up with soap and water.
- **Good Stain-Blocking Properties** — Effectively blocks stains from crayon, permanent marker, pencil, mustard, ketchup, and tea.
- **Versatile** — Use Quick Dry Stain Blocking Primer to prime and seal new and previously painted drywall, wood, masonry and plaster.
- **Color Selection** — Quick Dry Stain Blocking Primer can be tinted or used as a packaged color.

**Use on:**

- Wood
- Plywood
- Masonry (pH 6-9)
- Stucco (pH 6-9)
- Cement Composition (pH 6-9)
- Aluminum
- Galvanized Steel
- Previously painted surfaces
